

Beyond Expectation

KOREA

As a part the global network of Uddeholm, ASSAB's support is within reach no matter where you are.

## ASSAB Korea

ASSAB's position as an industry leader for the best-known brand in high-performing steels and alloys for tooling and industrial components has been further strengthened by our provision of top-quality metallurgical services for special steels. The core pillar of the ASSAB offer is the premium special steel supplied by our Uddeholm mill.

ASSAB Korea is now the leading distributor of quality tool steels and services in Korea. Our latest advanced support facilities, which include machining, heat-treatment and metallurgical services for all tooling applications, are located in warehouses near our customers in Incheon, Daegu, Busan and Gwangju.

Our close relationship with our customers is the cornerstone to our success in this established market. ASSAB Korea's philosophy is to add value to these partnerships by growing with our customers' changing needs, based on a commitment to providing only the finest quality services to our customers and optimising yields from existing resources.

ASSAB Korea's one-stop total solution concept ensures you peace of mind from selection to delivery.

## Products

ASSAB Korea supplies superior plastic mould and die-casting mould steels, steels for stamping, pressing, rolling, forming and blanking, hot work steels, strip steels and machinery steels.

## Services

**Machining** — We pre-machine the tool steels into the most suitable form for the toolmaker. This makes handling and preparation much simpler for the toolmaker and, more importantly, saves delivery time and money.

**Heat Treatment and Surface Treatment** — Our state-of-the-art vacuum furnaces provide the most appropriate heat treatment service to realise the quality of the steel and enhance the performance of the tools.

- Hardening and tempering
- Stress relieving
- Subzero treatment
- ABP

**Technical Support** — We have value-added technical support services to cover failure analysis and troubleshooting, laboratory services, seminars and technical training.

### List of Services in Korea

<b>Stocks</b>	Plastic mould, cold work, hot work for all types of tooling
<b>Delivery</b>	Daily delivery services
<b>Heat Treatment</b>	5 SCHMETZ vacuum furnaces (max 700x900x1200mm 10 bar), 10 muffle furnaces (max 1100x1200mm), 2 subzero equipment (max 800x1200mm)
<b>Machining</b>	7 milling machines, 9 grinding machines
<b>Bandsaw</b>	22 horizontal cutting machines (max 2000x4000mm)
<b>Technical Support</b>	Fully qualified technical service
