

ASSAB 

Beyond Expectation

THAILAND

ASSAB Thailand

ASSAB's position as an industry leader for the best-known brand in high-performing steels and alloys for tooling and industrial components has been further strengthened by our provision of top-quality metallurgical services for special steels. The core pillar of the ASSAB offer is the premium special steel supplied by our Uddeholm mill.

ASSAB Thailand's present premises occupy a land area of 7,300 m² and house the offices, warehouse and assorted machinery such as bandsaw, milling, grinding and CNC machines, as well as state-of-the-art heat treatment furnaces.

ASSAB Thailand is the first tool steel company in Thailand to receive ISO 9001 for the distribution of tool steels, and provision of machining and heat treatment services. With the wide-ranging inventory of tool steels and value-added services, we are able to provide a reliable one-stop-solution service to customers.

Products

ASSAB Thailand supplies superior plastic mould steels, cold work steels, hot work steels, Powder Metallurgy (PM) steels and machinery steels. In addition, we also supply heating elements and heating systems, crucible and refractory materials.

Services

Machining — We provide milling, grinding and 3D roughing services to meet your requirement.

Heat Treatment and Surface Treatment — Our state-of-the-art vacuum furnaces provide the most appropriate heat treatment service to realise the quality of the steels and enhance the performance of the tools.

- Hardening and tempering
- Stress relieving
- Nitriding
- Subzero treatment
- ABP

Technical Support — Our technical services cover project evaluation, tool failure analysis, laboratory services, as well as education and training.

List of Services in Thailand

Stocks	Plastic mould, cold work, hot work and PM steel for all tooling applications
Delivery	3-5 days delivery after confirmation of order
Heat Treatment	3 vacuum furnaces (10 bars), 1 Nitrex nitriding furnace, 13 hot-air tempering furnaces, 1 ABP and 1 subzero equipment
Machining	8 milling machines, 3 grinding machines, 1 CNC machine and 1 turning machine and 1 CMM machine
Bandsaw	2 CNC high-speed vertical bandsaws (max 1300 mm), 11 horizontal bandsaws
Technical Support	Fully qualified technical services - Inhouse seminars and failure analysis
